Ernest T. Atwell, field director of the Playground and Recreation association of America, has just returned to New York after spending the week in the city consulting with the officials of the Frederick Douglass Community association regarding the plans for the new building for which the association plans to break ground very shortly. Along with Mr. Atwell the first part of the week was W. J. Robinson, director of the Ohio-Michigan district of the Playground and Recreation association. Several changes were made in the original plans upon the advice of Mr. Robinson and Mr. Atwell. The building which it is planned to erect will be a modern two and one-half story building consisting of an auditorium to accommodate about 575 people, swimming pool, gymnasium, various classrooms, women's club rooms and library. This building will be erected at the corner of 12th and Pinewood on land already owned, free from debt, by the association. This property was purchased in 1926 by the association under the direction at that time of the late Albertus Brown. This building will fill a long-existing need in the city of Toledo for a suitable place to properly care for the leisure time of the 14,000 Negroes of the city of Toledo. This will enable the association to take care of its increasing work and to further extend its program to more fully meet the needs of each and every group of the population of Toledo. The association is directly affiliated with the Playground and Recreation association of America and the International Boy Scouts federation.
