Double Safety

DEAR EDITOR: I believe that all children of God are now free to get wise to themselves and practice the art of cleanliness and godliness which would be a

seven-year job on the part of the advancement groups of the world.

Now that the machinery has taken the place of heavy burdens. human beings do not have to look upon each other to do the tedious work because the machines shall be the beast of burden and mechanical slaves of mankind.

I believe that by cutting tunnels underground for traffic speedways we would provide air raid safety and produce enough clay for bricks to build \$10-a-month federal luxury apartments for all future citizens born into our American paradise. A Baha'i, Chicago.
