Miss Austin, a member of the National Assembly of the Bahai Movement, was royally entertained while here. The Delta Sigma Theta Sorority of which she is a member, entertained her with an elaborate reception at the Berkeley YM-YW center in Russell street when members of the past state presidents' council were hostesses, Thursday afternoon, March 27. John Lovell Jr., who received his doctor's degree in American Literature at the University of California in 1938, and who is now director of student affairs and associate professor of English at Howard University in Washington, D. C., is in the bay area where he is inspecting the student personnel system at the University of California. He is especially interested in the services provided for the college student and in the organization of the associated student of the University of California, admittedly the outstanding self governing body of college students in the United States. The University is one of several systems he has visited on his present tour which included similar systems at New York, Minnesota and Chicago. The purpose of the tour is to use the information gained from these inspections to assist in preparing a permanent and appropriate student personnel system for Howard University, which is one of the few American educational institutions to grow steadily through the war, and where the student enrollment is now about 7,000 alumni.
