Jack Johnson's Personal Letter to the Editor, Mr. Robert S. Abbott

A letter reached the old roll top desk on Monday, coming all the way from Barcelona, Spain, and in part, it said:

"I am making a big moving picture; my wife is co-starring in the same with me. Please let me know the address of the person in Chicago who acts as agent for companies producing pictures

featuring the members of the Race, as I think this will be a good market for productions of that description. If you will put me in touch with them, I will try and place them. Spain is a great country, and the field along the moving picture line is great. Your true friend,

"JACK JOHNSON."
